

Grammar no problem

By C. House, J. Stevens

Grammar No Problem is a tried and tested volume of grammar explanations and practice exercises which is invaluable both to those wishing to work on their grammar at home and for grammar practice in the classroom. Simple language is used to explain grammar phenomena, while colour indicators help differentiate and clarify complex grammar structures. Each grammar topic is dealt with on a double-page spread with explanations on the left and practice on the right. A removable key provides solutions for all the practice exercises.

New structures:

Aside from revisions of the existing material, the book now offers a series of progress tests at the end of the book, each test referring to a different chapter or section.

Business grammar:

In answer to the many requests for a workplace grammar book, *Business Grammar No Problem* has been devised and developed by the same authors, both of whom have a great deal of experience in creating material for business-English teachers and learners. The structure of the book remains unchanged, while the chapters focus on grammar topics in realistic business contexts.
