

NEW French-Stars
Practice books with reward stickers and self-study key

These French trainers cover all important topics of French in primary school and can be used independently of a textbook wherever extra practice material is needed – whether in class or at home.

A wide range of motivating exercises revise vocabulary and train reading and writing skills in a way that keeps the fun in learning a foreign language.

Students can work on their own and the integrated key makes it easy for them to check their answers.

Two special features are the picture dictionary and comics with Plume the rooster. The picture dictionary contains the vocabulary of all topics and can either be used alongside the exercises or as a general reference. The comics not only train reading skills but furthermore show students how much they already understand and promote continuous reading in the foreign language.

To make everything even more motivating and fun, the children can place a star sticker for every completed topic and for every read comic on the back inside cover. Once the last star is at its place, a well known sight will shine in their light.

Perspectives – New Edition

Perspectives – New Edition is a modern communicative textbook for adult education. Over three volumes it leads to the B1 level of the CEF and prepares students for the European language certificate for French and DELF examinations.

The course and work book comprises 12 unités and six optional units, an appendix, audio CDs containing all listening texts and a vocabulary trainer.

The 12 unités are clearly structured. Each unit consists of ten pages:

- the *Introduction page* introduces the theme of the unit, lists the vocabulary and encourages spontaneous speaking.

- the following four *Presentation pages* contain lively dialogues and varied texts and activities which systematically build up the students' linguistic competence. The development of listening comprehension plays a central role here, and a graduated practice program promotes the systematic training of this skill.

- the *Gros plan sur page* provides students with insights into France and the franco-phone world through a series of texts with relevant regional themes.

- the three *Exercices pages* contain consolidation exercises in grammar, vocabulary, phonetics, listening and reading comprehension, and communication.

- the concluding *Repères page*, which focuses on linguistic competence, clearly summarizes the learning content and grammar.

The optional *Pour approfondir* unit offers additional motivating texts and activities around the themes of *Pour la profession* and *Français et francophones*. The fourth page, *Autoévaluation*, enables students to monitor their progress.

Supplementary materials provided:

The *vocabulary trainer* lists all new words in order of appearance together with their pronunciation and translation.

The *audio CD for the classroom* contains all listening material and phonetic exercises.

The *audio CD for home* contains selected texts in learner-friendly versions, listening exercises corresponding to the exercise sections, and selected expressions to practise from the *Repères* sections.
