B

1. Georg, es ist Elijah Mwanza. Er ruft aus Zambia an und wollte dich wegen einer neuen Geschäftsstelle in einem Nachbardorf sprechen.
2. *What kind of business is it? If it was for repairing bikes, a different location would be better.*
3. Ja, das ist der Grund warum er dich anrufen wollte. Er versteht aber nicht, warum er es nicht dort aufbauen sollte. Er sagt, wenn er einen zusätzlichen Standort hätte, könnte er die Räder noch effektiver reparieren.
4. *It's better if the bicycle repair shop is quite a distance away, in order to reach more people.*
5. Er stimmt Dir dabei zu. Sein Bruder lebt in einem Dorf nicht weit weg von seinem Standort. Er wäre der Richtige für den Job, falls ihn jemand in die Fahrradreparatur einweisen würde.
6. *Well, this won't be a problem, if your brother agrees to do the job. If we hadn't had so much work here, we would already have sent a team. Do you need anything else?*
7. Nein, er braucht hat alles was er braucht um sich um die Räder zu kümmern. Er wird wieder anrufen, falls er etwas braucht.

C

- |                       |                                    |
|-----------------------|------------------------------------|
| 1. would have allowed | 4. would they have done            |
| 2. promise, to do     | 5. has to be convinced, want to go |
| 3. hadn't made        | 6. will be, says                   |

## An interview

A Kristina Jasiunaite

occupation:	CEO of World Bicycle Relief Germany
started working in:	Since 2013
previous job:	worked in previous company of WBR founder
reason for current job:	fascinated of idea of WBR
most important event in job:	trip to Africa (Zambia)
4 examples for tasks in her job:	administrative tasks, book-keeping, communication, filing, awareness-raising, fund-raising, finding and engaging new partners

B

Yes, before a bicycle arrives in Africa we need to create the right bicycle for Africa and this is a very important point, because you have to develop a product that is the best solution for the people living in an African environment. Bicycles available in Europe or maybe in the US are mainly created to ride on asphalt roads or they are mountain bikes that would be far too expensive for many, many people. So this means that we have to find bikes that are inexpensive and robust so that they can transport heavy loads and survive bad road conditions (or no roads at all). And then, if we fulfilled all this criteria and know what is required to make a sufficiently strong bicycle, we need to make sure that the parts produced are the right quality. Today we produce the parts in China and monitor production to ensure that the quality is suitable. After that, the parts will be loaded onto a ship container and shipped to Africa. As soon as they reach the port there, they are loaded onto trucks and taken down the long road to the factories. At the moment we have five factories on African ground where the parts are assembled.

C

1. Children that cover very long distances to get to school. / Children that can't attend school because they have to take care of little brothers or sisters.
2. They have to do a large number of chore before they have the right to go to school.
3. In average 110 € including parts, shipment, transport and assembly...
4. for the whole family, community ;household chores; transport goods to market; transport water or maize tot he grinding mill; access to school
5. They ride to the cities and pick up parts from wholesalers.
6. A prize by Barron's in the US for being one of the most effective philanthropist organisations in the world.

## D

2 words that rhyme with "share":	healthcare; there, where, ...
8 words that begin with "pro":	profit, provide, produce, programme, product, properly, project, production
10 adverbs with the suffix "ly":	really, mainly, deeply, sufficiently, secondly, finally, properly, automatically, perfectly, extremely
4 words that rhyme with "rent":	environment; implement; moment; per cent; shipment; element
10 different words ending on "tion":	education; organisation; mention; communication; emotion; transportation; solution; production; condition; question
12 words with the prefix "re":	relief; realize; require; representatives; reason; reasonable; receive; repairs; reduce; recognise; really; reach

## E

World Bicycle Relief is an organisation that doesn't want to make **profit** out of their business, but tries to help people to increase their **mobility and chances**. The first one to start with this idea was a man called **F.K. Day**. He thought that it would be most **effective to** help people in Africa with bicycles. Kristina Jasiunaite, the **CEO** of WBR Germany, found out that **daylight** is very important for the people, because every day begins and ends with it and limits the people's lives. So she loves her job helping the Africans by doing **administrative** tasks as well as **communicative** tasks. She even has to talk to the media to find new **partners** for the organisation and to tell them which steps have to be taking until pupils can receive a bicycle. At first the bike has to be **created** and fitted to the African **environment**. Then they produce the **parts** in China under strict **monitoring** and ship them to Africa where they are assembled in **factories**. Later on, a **committee** consisting of different people from different groups **decides** who is going to get a bike and talks about a **catalogue of** criteria to find out who will be given priority. Then they make **contracts** with the pupils that are confirmed by everyone in the community watching the event. It may sometimes occur that even if the bikes are **simple** and **robust** they need some service. Hence WBR has trained field **mechanics** and supplied them with **spare parts**. In difference to WBR USA, WBR Germany foremost tries to help people by supporting **education** and wants to **bring** as many people on bikes as possible.
